Avalanche (AVAX) Price Prediction 2022-2030: What's the Future of AVAX?

Original:

<https://www.btcc.com/en-US/academy/research-analysis/avalanche-avax-price-prediction-2022-2030-whats-the-future-of-avax>

AVAX Price Prediction - An Overview

-End of 2022:In 2022, our AVAX price prediction forecasts the maximum price [AVAX](#) can reach is \$23.71, and the average trading price is \$19.76.

-End of 2023:The Avalanche coin is expected to reach maximum and minimum price levels at \$36.88 and \$28.98 in 2023.

-End of 2025: The expected maximum and minimum Avalanche crypto prices are \$39.16 and \$58.74 in 2025.

-End of 2030:Avalanche may have a long-term future, so there may be scope for AVAX's price to cross the \$129.09 mark by the end of 2030.

The [blockchain](#) network Avalanche ([AVAX](#)) has seen its fortunes tumble in 2022. After losing more than 85% of its value in 2022, Avalanche's native token, AVAX, has fallen off the list of the top 10 most valuable cryptocurrencies by market capitalisation and now ranks at NO.18.

The AVAX token witnessed a sharp sell-off in May caused by Avalanche's close association with its peer [Terra](#), after Terra's Luna Foundation Guard had built an AVAX reserve worth \$200m.
[TRADE_PLUGIN]AVAXUSDT,AVAXUSDT[/TRADE_PLUGIN]

Even recent partnerships with Chainlink and Robinhood have struggled to slow the downward trajectory. As of 15 November, AVAX was trading at approximately \$20.31, a long way below its all-time high of \$146.22, hit on 21 November 2021, CoinMarketCap data showed.

In this article, we will talk about Avalanche and why it claims to be “the world’s fastest blockchain network”, plus important updates, price analyses and a look at the AVAX price prediction.

Before we start with a detailed Avalanche crypto price forecasts, let’s dive into the coin’s overview.

Avalanche (AVAX) Overview

Cryptocurrency	Avalanche
Ticker Symbol	AVAX
Rank	18
Price	\$20.31
Price Change 24H	+8.61%
Price Change 7D	-19.69%
Market Cap	\$3,968,696,287
Circulating Supply	300,400,298 AVAX
Trading Volume	\$203,269,076
All Time High	\$146.22
All Time Low	\$2.79

What Is Avalanche (AVAX)?

In the blockchain world, scalability and speed are among the main technical hurdles for decentralised finance (DeFi) projects seeking to go mainstream. Smart contract platforms such as Avalanche and Solana (SOL) have been chipping away market share from the market leader, Ethereum (ETH), by offering users lower [gas fees](#) and faster transactions.

Avalanche claims to be the fastest smart contract platform in the blockchain industry “as measured

by time-to-finality". According to Avalanche, time-to-finality is the time a user has to wait to receive confirmation that a transaction made on the blockchain will not be changed or canceled.

Let's look at Avalanche's core features and how it differs from other smart-contract platforms.

What Makes Avalanche Unique?

Snow protocol

Avalanche aims to achieve low-latency, high-transaction throughput and scalability via its native Snow protocol, which combines the properties of a classical consensus protocol and Nakamoto consensus.

Avalanche's whitepaper says the classical consensus protocol offers low latency and high throughput but has problems with scalability because of its reliance on "all-to-all communication" to reach consensus. The whitepaper said that the Nakamoto consensus used by proof-of-work networks such as Bitcoin suffers from high latencies, low throughput and constant energy requirements.

Under the Avalanche Snow protocol, each node polls a small, constant-sized, randomly chosen set of neighbouring nodes to achieve consensus, instead of the "all-to-all communication" seen in classical consensus protocols.

Subnets

The use of subnetworks, or subnets, on Avalanche helps to reduce network traffic and facilitate customisability on its network. Avalanche says a subnet is a dynamic set of validators working together to achieve consensus on the state of a set of blockchains.

Validators, also referred to as 'stakers' on [proof-of-stake](#) (PoS) networks such as Avalanche, can be members of multiple subnets. Each blockchain built on Avalanche is validated by one subnet, and each subnet can validate many blockchains.

Avalanche said that its subnet model reduces network traffic by allowing validators to choose which subnet to join in order to validate a blockchain. Subnets can also be designed to be private subnets by deciding which validators can enter them.

The Avalanche network has a "default subnet" which is validated by all validators. The default subnet, also known as the 'primary network', validates a set of three predefined blockchains on

Avalanche: Exchange Chain (X-Chain), Platform Chain (P-Chain) and Contract Chain (C-Chain).

X-Chain, P-Chain and C-Chain

X-Chain is a blockchain on Avalanche used for creating and trading digital smart assets.

P-Chain is a blockchain on Avalanche which enables the creation of new subnets, coordinates validators and keeps track of active subnets.

C-Chain is a blockchain on Avalanche that is used to create smart contracts. The C-Chain is an instance of the Ethereum Virtual Machine (EVM), according to Avalanche.

Latest Avalanche Crypto News

Recently, Avalanche discussed on Twitter its partnership with Chainlink, an oracle network for blockchains. Avalanche revealed that “10 million+ data points, smart contract automation, and verifiable randomness have helped secure \$550m-plus in value”.

The collaboration had also grown Avalanche’s non-fungible token ([NFT](#)), gamefi and DeFi offerings, especially when encouraging developers to build on the blockchain.

It said: “With Avalanche’s high-speed network and Chainlink’s highly reliable oracle infrastructure, devs can drive the next wave of Web3 innovation with advanced, secure and scalable dApps.”

AVAX has recently gone live on Robinhood’s brokerage platform. Investors could send and receive the cryptocurrency via Robinhood from 29 September.

AVAX Crypto Price

AVAX/USD, all-time performance

Up until the crypto market crash of May 2022, for which the collapse of the Terra ecosystem was an important catalyst, AVAX had firmly established itself as a top 10 cryptocurrency in terms of market capitalisation.

However, after losing more than 85% in 2022, the avalanche cryptocurrency had fallen to the 18th spot in the list of most valuable cryptocurrencies, as of 24 October 2022.

The majority of the losses came in the months of April and May, as tightening monetary conditions and the collapse of the Terra ecosystem caused AVAX to post monthly losses of more than 40% in April and more than 50% in May. AVAX was unable to stem its decline as the level-1 token posted its third consecutive monthly loss in June.

At the trading price of \$20.31 as of 15 November 2022, AVAX is a long way below its all-time high of \$146.22, hit on 21 November 2021, data from CoinMarketCap showed.

The Avalanche ecosystem has also seen a massive drop in total value locked (TVL), DeFiLlama data showed. TVL on Avalanche plunged from its peak of more than \$12bn in December 2021 to about \$1.34bn, as of 15 November 2022.

Technical Analysis of AVAX Price

Since the beginning of April 2022, AVAX witnessed a downward trend on its weekly chart, with the two major support and resistance levels at \$75.46 and \$29.30.

AVAX Weekly Chart

A bounce from \$55 was seen in early 2022, which took AVAX to \$98, and a bearish momentum was then followed. The weekly price chart showcased that AVAX's price was the lowest it has been since May 2021, with the RSI going way below the neutral 50 line. Since the price has been in a downtrend, the RSI has been below neutral 50, so there was not much scope for bulls in the market. Overall, there has been no indication of a trend reversal yet.

However, the MACD continued to rise even though the price fell, where the price made lower highs and the MACD made higher highs, indicating a hidden bearish divergence. On the other hand, the

daily time frame was seen to be bullish.

Should You Consider Buying AVAX Coin Now?

Based on the price chart, traders looking to trade with the trend can wait for a bullish trend before beginning to buy, which would not be the case until \$21.17 and \$29.30 are flipped to support. If AVAX does see movement in any direction, then using the Relative Strength Index (RSI) and Moving Average Convergence/Divergence (MACD) will help traders.

FAQs

Why is AVAX dropping for the past several months?

AVAX has been dropping for the past several months due to the Terra Luna crash and turbulence in the whole crypto market. However, although its price has dropped, it is still doing quite well and has shown some growth potential.

Is Avalanche crypto a good investment?

According to AVAX price prediction for the next five years, the AVAX price will hit a \$101 high, making it a good investment. The minimum price for the year 2027 is estimated to be \$91. Various Avalanche price predictions in the market favor the long-term earning potential of the crypto. However, do your own research and do not take this information as investment advice to buy AVAX. But, you may read the forecast and track the rise/drop in the price before you buy Avalanche.

How high can Avalanche go in 2022 and beyond?

The average AVAX price could exceed \$19.76 this year. Within the next 5 years, the price of AVAX is expected to rise above \$91. Please keep in mind that the crypto market is very volatile and this Avalanche price prediction does not account for extreme wild swings in price.

Does Avalanche crypto have a future?

According to Avalanche price predictions, the future of this coin is very bright. By 2030, we expect Avalanche to have crossed the \$120 mark. However, you should still DYOR and check whether it fits your portfolio before investing in it.

How much will Avalanche be worth in 2025?

The Avalanche coin is expected to have minimum and maximum prices of around \$39.16 and \$58.74, respectively, as per our AVAX price prediction 2025. The average price of AVAX should be around \$48.95.

How much will Avalanche be worth in 2030?

Avalanche price prediction 2030 reveals the AVAX price to reach a new ATH of \$129.09, the new minimum price of Avalanche could be \$121.18. The wide acceptance of the Avalanche coin in the future will aid in growth and market cap.

Where can I buy Avalanche crypto?

AVAX is available on many major exchanges — for example, Binance, BTCC, and so on. Such exchanges are especially great for buying crypto with fiat. If you'd like to buy AVAX with extremely low fees, you should try [BTCC](#).

Avalanche (AVAX) is trading on BTCC, check the link below to buy AVAX now.
