Best Crypto Exchanges in 2022

Original:

<https://www.btcc.com/en-US/academy/crypto-basics/best-crypto-exchanges-in-2022>

With over 1000 crypto exchanges worldwide to choose from, it can sometimes be hard to decide where to start.

This is [BTCC](#), and in this video we'll give you the top 3 best cryptocurrency exchanges in a 2-minute review.

Choosing a cryptocurrency exchange is not an easy task: there are many factors to consider. Whether or not the exchange can operate in your country, payment options, fees, verification requirements, and of course the choice of available coins are just a few of the factors to consider when making your decision.

Binance

Our No.1 recommendation for the best crypto exchange for non-US residents would have to be Binance.

Binance is a global exchange that has quickly become one of the leading cryptocurrency exchanges, although it was recently founded in 2017. Binance supports 200+ coins and offers a wide range of different financial services, which is why we think it's a great place for beginners and experienced traders alike.

Whether you're looking for an advanced trading platform, a simple way to buy cryptocurrencies using a credit card, or other cutting-edge features like a savings account, crypto debit card, or [futures trading](#), Binance has you covered.

The only area we see where Binance could improve is its customer support.

Coinbase

If you're looking for an exchange that supports US residents, then Coinbase is probably the best choice.

While their customer support can be intimidating at times, Coinbase still offers a simple process for purchasing all major cryptocurrencies, with FDIC account insurance and a 0% fee for ACH deposits.

If you're looking for more sophisticated trading capabilities, Coinbase also operates Coinbase pro, which is a premium trading platform.

Coinmama

Finally, if you need the fastest option for buying cryptocurrencies and don't have time for a long authentication process, then we think Coinmama is the place for you.

Coinmama is a veteran of the crypto community, with more than 2 million customers in over 188 countries. It offers a simple brokerage service to sell a variety of leading cryptocurrencies through the use of credit cards and only takes about 30 minutes to complete a super fast verification process.

One of the downside is that this process will cost you about 5% fees more than other crypto exchanges, so we only recommend this if you want to buy cryptocurrencies as fast as possible.
