Best Crypto Leverage Trading Platform - An Overview

Here is a quick take of the best crypto leverage trading platform for 2023:

Exchange	Max. Leverage	Cryptocurrency (to name a few)
BTCC	1:150	BTC, ETH, LTC, XRP, ADA, XLM, BCH, EOS
Binance	1:125	ADA, BCH, BTC, DOT, ETH, Link, LTC, TRX, XRP
BitMEX	1:100	BTC, LTC, ETH
BaseFEX	1:100	BCH, BNB, BTC, ETH, LTC

With the rise of cryptocurrencies worldwide, leverages is one of the most important and frequently used functions in crypto margin trading. Shortly after the establishment of centralized exchanges, cryptocurrency leverage trading became increasingly popular despite its high volatility in the crypto market.

The leverage ratios have also been increasing from 3x, 5x to over 100x. Higher leverage means higher risk, but as shown by the growing leveraged trading volumes, this also means that aggressive traders are willing to undertake, in pursuit of higher returns.

In this article, we'll take a deep dive into the best crypto leverage trading platform, and we'll show you where to trade with the highest leverage right now.

You must have heard of [BTCC](#), one of the world's leading and longest-running crypto margin trading exchanges with 10 years of stable and secure operating history. And apart from that popular trading site, there are also some other cryptocurrency leverage trading exchanges available offering similar

margin trading services, which we'll go into details together below.

Before we start with the list of top crypto leverage trading platform, let's have a look at what the leverage in crypto trading is.

What is Leverage in Crypto Trading?

As one of the most important features in crypto trading, leverage refers to using borrowed capital to make trades. Leverage trading can amplify your buying or selling power, allowing you to trade with larger amounts. So even if your initial capital is small, you can use it as collateral to make leveraged trades, through which your trading profits will be multiplied more than the original investment could bring. While leveraged trading can magnify the potential trading rewards if the market moves in traders' favor, it can also magnify the risk if the market goes against their position, which may lead to substantial losses. That's why you must be careful when trading crypto with leverage.

The amount of leverage is also described as a ratio, which indicates the number of times your initial capital is multiplied. For instance, an x5 leverage will multiply your buying power by 5 times and increase \$100 BTC position into \$500. The ratio differs on various exchanges, with 1:5 (x5), 1:10 (x10), or 1:20 (x20) being some of the most common variations. And some leading exchanges support higher 100x - 150x leverage, which allows traders to open a position that is 100 times the value of their initial deposit. On [BTCC](#), for example, you can borrow up to x150 of your actual balance.

The leverage ratio can also vary from pair to pair on the same exchange. On BTCC, for instance, you can access [x100 leverage on ETH/USDT](#), and [20x on ADA/USDT](#). On top of that, leverage also works with crypto derivatives, margin, futures, and leveraged tokens.

Although the concepts of margin and leverage in crypto seem similar, they are, in fact, inversely related — the higher the margin, the lower your leverage ratio.

Trade Crypto with Leverage

So how does one start trading crypto with leverage? First, ensure you have deposited enough funds into your crypto exchange account to use as collateral. If you have a certain number in mind, you need to do a simple calculation of leverage and margin. To obtain \$10,000 worth of ETH with a [100x](#) leverage, you will need to [deposit](#) \$100 in ETH.

Additionally, to avoid liquidation when a market moves against you, you will have to ensure a margin threshold or maintenance margin by depositing more funds.

Leverage works with both long (anticipating the asset price will go up) and short (anticipating the asset price will decrease) positions.

Best Crypto Leverage Trading Platform

BTCC - One of the most secure and long-running exchanges

Leverage: 1:150

Coins: BTC, ETH, LTC, XRP, ADA, XLM, BCH, EOS and many more altcoins

BTCC is one of the world's safest and longest-running cryptocurrency exchanges founded in 2011. It is a licensed exchange in Europe, and holds an MSB license in the US and Canada. This popular crypto platform features a differentiation strategy and an extremely user-friendly and secure APP which can meet the needs of all levels of investors from beginners to professionals.

BTCC probably offers one of the lowest transaction fees in the industry – only 0.03% for every trade. It offers flexible leverage from 10x to 150x on Bitcoin, Ethereum, and other popular cryptocurrencies.

Having been providing reliable crypto trading services over the past 11 years, BTCC is a wise choice for crypto investors. Most users who choose the platform do so because of its liquidity, reliability, ease of use, and security.

Binance - World's No.1 Crypto Trading Exchange

Leverage: 1:125

Coins: ADA, BCH, BTC, DOT, ETH, Link, LTC, TRX, XRP

Binance is believed to be the most comprehensive crypto exchange in the world, whose product range includes all conceivable services around cryptocurrency trading. Compared to most other platforms, it offers much more altcoin margin trading and cryptocurrency futures.

Even when it comes to high leverage futures, Binance has more products to trade than other Bitcoin trading platforms because it has futures on a range of altcoins like ADA or Link. Trading begins with 20x leverage by default, but can be increased up to 125x.

Binance Altcoin Exchange: Over 80 altcoins can be traded with USDT or BTC here. This trading platform also supports fiat currency transfers, but in this case you will of course have to verify your account. This is always the case when accepting fiat currency.

Although Binance has been hacked, the platform remains as strong and popular as ever.

And the hacks hadn't have an impact on traders' trust because the platform compensated for all the losses. This is why Binance is still considered one of the safest crypto trading platforms.

BitMEX - Long-Term Market Leader in Bitcoin Margin Trading

Leverage: 1:100

Coins: BTC, LTC, ETH

BitMEX is the first Bitcoin margin trading platform for professional day traders due to the variety of advanced trading possibilities on the platform.

In addition to 100x leverage, Bitcoin Merchant Exchange offers a variety of advanced orders for the highest degree of automated trade setup. So, if you want to be able to use settings like "post only", or even iceberg orders, then this trading platform is very suitable for you.

Besides, BitMEX is known for its incredibly powerful trading engine that does not allow any delays. As the largest high-leverage Bitcoin trading platform, BitMEX is also the most liquid one. Therefore, on this Bitcoin trading platform, your orders has the highest probability of being executed.

BaseFEX

Leverage: 1:100

Coins: BCH, BNB, BTC, ETH, LTC

BaseFEX is another cryptocurrency exchange that trades with high leverage. However, the 100x

applies to BTC, and the altcoins can only trade up to 20x. A group of crypto traders established the company in 2018 with a focus on good customer service and the simplest possible trading interface.

Six cryptocurrencies can be traded against USD or USDT. The transaction fees are relatively low - commonly 0.06% for every trade. In Bitcoin transactions, makers get a rebate, so they can even get paid (0.02%) for their transactions. In altcoin trading, makers get 0%, while for takers the 0.06% apply.

Conclusion

In this article, we have explain the concept of leverage in crypto trading and introduced the best crypto leverage trading platform.

Cryptocurrency leverage trading can make or break your end game; although, the big losses often come from one's inability to properly manage the risks. Volatile crypto markets make crypto leverage trading even riskier but can also gain you a handsome profit.

Once you feel confident enough to give crypto leverage trading a try, you can easily access it on BTCC. The BTCC exchange allows users to trade crypto with up to x150 leverage on various trading pairs and increase their position size and profit.

Apart from cryptocurrency leverage trading, BTCC also launched tokenized futures lately, allowing users to trade stocks and commodities futures with USDT as the margin.

The process of trading futures leverage with BTCC begins with [registration](#) and log in. New customers can now sign up [here](#) to get a welcome bonus of 10USDT, and complete the Know Your Customer verification process to access all BTCC's features and BTCC discount. Once verified, you can trade crypto with leverage on BTCC now.
