Near Protocol (NEAR) Price Prediction 2023, 2024, 2025 — Will NEAR Hit \$100?

Original:

<https://www.btcc.com/en-US/academy/research-analysis/near-protocol-near-price-prediction-2023-2024-2025-will-near-hit-100>

Developing protocols and their native assets have been well supported by the global [cryptocurrency](#) market. Some emerging protocols have successfully established themselves as the market leaders. An example of this is the recently popularized Near Protocol. Features of the network, like as faster transaction times, neutrality toward the environment, and reduced transaction fees, have been pluming its already lofty perch.

In order to carry out network operations like completing transactions, the [Near Protocol](#) makes use of NEAR, its native asset. In exchange for helping out with things like staking and board meetings. The alternative coin has a return on investment of 342.07%. Do you want to invest in NEAR but have doubts about how profitable it would be? Don't bother looking any farther; we've deciphered the NEAR price forecast for 2023-2025 and beyond!

What Is Near Protocol (NEAR)?

The NEAR Protocol is a public Proof of Stake (PoS) blockchain designed with the end user and programmer in mind. In 2018, industry veterans Alexander Skidanov and Illia Polosukhin launched The Protocol. Both men have worked with industry giants including Microsoft and Google. They planned to use their combined skills in machine learning, but instead they found themselves drawn to blockchain technology. After it, the NEAR Protocol was developed.

NEAR is a smart-contract-enabled blockchain built with user friendliness in mind, and is intended to serve as a platform for dApps. To better compete with other blockchains that can execute smart contracts, like Ethereum and EOS, NEAR has added a number of features to improve the user experience.

For instance, the platform combines human-readable account names alongside crypto wallet addresses, so users can interact with smart contracts and dApps without the need for a wallet.

The goal of one of NEAR's most extensive initiatives is to build a decentralized, permissionless network where no one—not even governments—can interfere. NEAR wants to differentiate itself from Meta and other platforms it sees as “biased, closed ecosystems” by giving its users more agency over their own data.

NEAR's answer is a “community cloud” where users may keep their data, identities, and finances protected and transact with one another without needing third-party services or approval.

The NEAR Protocol's storage and transaction costs are paid for with its native coin, NEAR. In addition to ensuring the integrity of financial dealings, NEAR uses its own cryptocurrency tokens to incentivize validators to protect the network against malware and fraudulent activities. The NEAR Protocol is predicted to continue its meteoric rise, which bodes well for the token's future price.

Near Protocol (NEAR) Price Prediction 2023

Some believe that Near Protocol is one of the most impressive new cryptos to emerge this year (NEAR). The second half of 2023 is expected to see a sharp increase in NEAR price, with estimates going as high as \$2.81.

The price will gradually increase, but there won't be any major decreases like other cryptocurrencies have had. Pricing at an average of \$2.62 is ambitious, but not impossible in light of upcoming partnerships and innovations. The lowest possible price for NEAR is \$2.24.

Near Protocol (NEAR) Price Prediction 2024

Forecasts for the NEAR price in 2024 show substantial space for growth. We forecast that the price of NEAR will shortly rise above \$4.68 as a result of the possible announcement of various new collaborations and projects. Wait till the relative strength index for the NEAR exits the oversold area before getting too bullish.

NEAR will trade between \$3.74 and \$4.12, with \$4.12 being the average price due to market volatility.

[Download App for Android](#)

[Download App for iOS](#)

Near Protocol (NEAR) Price Prediction 2025

If the current rate of growth continues until 2025, it might reach \$6.55, which would be profitable for NEAR. A market fall could make it impossible to reach the target. In 2025, the average price for NEAR is forecast to be \$5.99, while the low is seen at \$5.61.

Near Protocol (NEAR) Price Prediction 2030

Near Protocol will set new ATHs by the year 2030. With a possible low cost of \$14.96 and a high of \$15.90, the average price is \$15.34.

Is Near Protocol (NEAR) A Good Investment?

To address the issues of slow transaction times, limited throughput, and poor interoperability that plague blockchain technology, Near Protocol was developed.

In addition to being used for staking and paying network transaction fees, NEAR tokens have found a practical use. Token holders also have the right to vote on different suggestions to enhance the platform.

Also, let's evaluate how well Near Protocol has done in contrast to one of its major competitors, Solana.

Will Near Protocol (NEAR) Hit \$100?

At its present price of \$1.56, NEAR cryptocurrency would need to increase in value by 641, or to reach \$1000. NEAR cryptocurrency will take about 33.21 months to double in value, given its 1.93-fold monthly increase (as calculated above) (less than 3 years).

Once again, the reasons driving the economy and the liquidity environment are different from when it was at its peak. As a result, we shouldn't anticipate NEAR to continue its rapid expansion at the same rate it has in recent years.

Hence, even if economic fundamentals improve, it will take a much longer for the price to reach \$100.

Can Near Protocol (NEAR) Hit \$100?

Starting at its present price of \$2.34, the NEAR token would need to increase in value by almost 427 times before it would be worth \$1000. There was an 11.59-fold increase in NEAR's value over that same time period, taking it to a price of \$20.18.

Taking into account its 1.93-fold monthly growth, we can calculate that it will take Near Protocol at least 221 months (almost 18 years) to reach \$1,000. The time it takes to reach that value, however, is very variable and subject to the macro and micro economic conditions of the moment.

Conclusion

The NEAR Protocol stands out from competing solutions thanks to its innovative set of capabilities for developers and its laser emphasis on ease of use. When looking at NEAR's track record and the features it provides, it's clear that the coin has enormous potential to become one of the top Web 3.0 cryptocurrencies and generate massive profits.

Despite the current state of the market, NEAR is a crucial token to keep an eye on because of the revolutionary potential it holds.
