What a pleasure it would be if it could become part of the reward for the cryptocurrency boom in 2022. Cryptocurrency market shows unprecedented attraction to investors; The global movement is growing rapidly! This is also our goal. When you think about how quickly the first three years have passed, especially if you are in the digital field, you can see how the mood has spread wildly among cryptocurrency traders around the world.

Using the dollar cost averaging method to add tokens to the portfolio can bring huge profits to cryptocurrency investors. Let's take a look at three cryptocurrencies that may provide huge benefits in the future. Shiba Inu (Shib), Apecoin (APE) and seesaw (SSW) protocols. These three currencies may promise to bring a king level upgrade to their investors.

Seesaw Protocol (SSW)

The SSW token of seesaw agreement has been released on the local exchanges of the agreement, pancakeswap and seesaw swap. The seesaw agreement will soon become the preferred platform for farmers and yield seekers, with a liquidity of \$1 million.

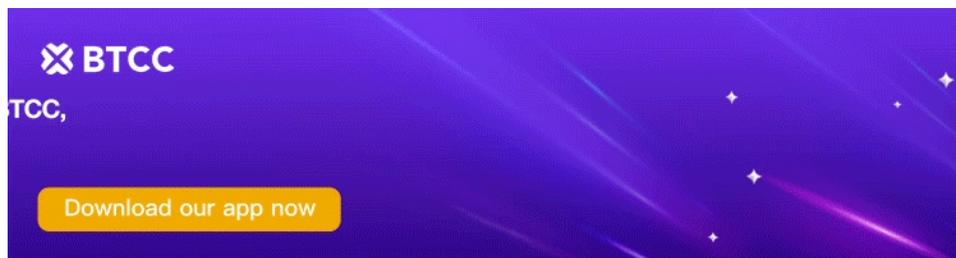

Seesaw tokens currently trade at \$0.0014 and may increase fivefold in the near future, as the agreement has many potential values and upgrade plans.

SSW went public in coingecko and coinmarketcap in less than four days, which shows how excellent the community is and their commitment to ensuring the sustainability of the currency.

Seesaw, as a bridge across block chains, such as binance smart chain (BSC), Ethereum (ETH) and polygon (Matic), is one of the main reasons for its success. This means that when trading, its users can use their favorite blockchain while maintaining speed and cost control.

SSW adopts Defi technology to keep the cost of your digital wallet to the lowest level and allow you to transfer and purchase in a few seconds; All you need is an Internet connection (and, of course, your device)

Please verify your information through dyor. SSW is a newly launched product with better potential than the exciting Shib, although many investors have made a lot of profits from Shib. SSW is likely to be the next coin to replicate this significant return.

Shiba Inu (SHIB)

Shiba Inu (Shib), a currency inspired by Dogecoin, recently announced the creation of its own Metaverse. Shib: Metaverse plans to provide more than 100000 pieces of land, which will be shared at different costs in different periods.

The Shiba Inu (Shib) team has been secretive about the payment method of these lands. However, one thing is certain: players will be able to earn a lot of money and convertible game assets. Shiba Inu has just been listed on the Robinhood exchange. The team revealed that it plans to launch the highly anticipated shibarium driven Metaverse for the first time the next day. Shibarium is a layer 2 solution, similar to the operation mode of Ethereum's polygon (Matic). Shib tokens rose on the news of twins, which may provide the necessary impetus for 10x earnings.

If you miss the huge return of Shiba Inu (Shib) last year, you don't have to worry. Seesaw protocol

(SSW) may provide you with similar benefits.

Apecoin (APE)

Apecoin is a new cryptocurrency, which has caused a sensation in the cryptocurrency community since it was launched a few days ago. The price of ape, like many other tokens, broke an all-time high on its first day of existence.

Apecoin (APE) performed best among the top 50 existing cryptocurrencies, rising 9.1% in less than seven days. Of course, this shows the remarkable development of the company since its establishment.

Apecoin (APE) now trades at \$16.25, a record high of \$17.17 more than a month ago. Apecoin is the governance token of ape ecosystem, which allows token holders to participate in Apecoin Dao and provides shared and open currency, which can be used without centralized middlemen. The ecosystem fund will receive 62% of all Apecoin and will support community driven activities determined by Apecoin Dao members.

Ape ecosystem is composed of two most popular NFT aggregates on Ethereum blockchain. Bored ape Yacht Club (bayc) and mutant ape Yacht Club (mayc). Bayc has developed into the world's largest brand of NFT. Since its launch in April 2021, its sales have reached millions of dollars. Serena Williams, Adam Draper, Eminem and Mark Cuban are all on the growing list of prominent owners.
