## Top 10 Altcoins With the Greatest Potential in 2022

Original:

<https://www.btcc.com/en-US/academy/research-analysis/top-10-altcoins-with-the-greatest-potential-in-2022>

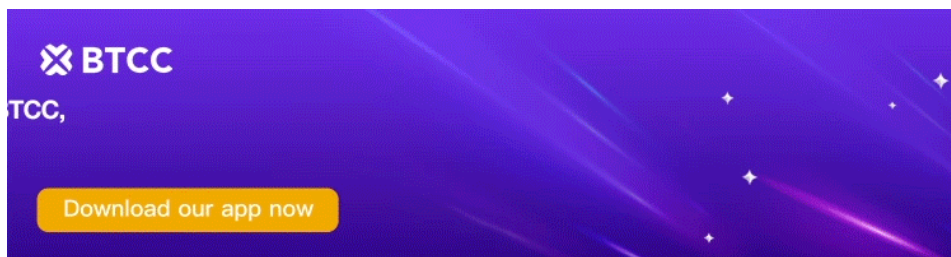

There are many [Altcoins](#) on the market today. Here are the top ten Altcoins for your investment.

It is not surprising that the demand for Altcoins has increased dramatically in 2021 and now. As more and more people prefer other sources of income, there is an unprecedented demand in the cryptocurrency market. Although bitcoin can always attract attention from all over the world, there are other cryptocurrencies that may also enter your portfolio.

In addition to bitcoin, all other cryptocurrencies are called alternative currencies. Now, there are many large companies in the market that have shown strong interest in Altcoins. Therefore, it is very meaningful to look at the top ten Altcoins worth buying.

### Ethereum

[Ethereum](#) is the most famous altcoin. For many investors and enthusiasts, it is not just another cryptocurrency. And experts say its value could grow by as much as 400% in 2022. The value of Ethereum's native token, ether coin (ETH), has increased greatly since its birth.

## Binance Coins

The future of BNB depends on the growth of binance exchange platform. According to the current situation, the future of binance coin looks bright, which may push the price to a new high. Therefore, according to BNB's price forecast, BNB's price may exceed US \$610 by the end of 2023. Therefore, it is one of the best non bitcoin cryptocurrencies to buy before 2022 to obtain wealth.

## Cardano

Cardano is the third generation cryptocurrency. Its features provide the best combination of the first and second generation cryptocurrencies, such as bitcoin and Ethereum. It uses proof of ownership (POS) instead of proof of work (POW), which improves its sustainability compared with other encryption systems. Experts recommend investing in Cardano.

## Terra

Terra (LUNA) brings many benefits to the market. Its decentralized and unlicensed nature makes it an ideal choice for digital economy. The network provides competitive programmable payments, logistics, and infrastructure designed to simplify DAPP and stable currency development.

## Avalanche

Avalanche is one of the few blockchains that can be extended without sacrificing decentralization. Its potential to interoperate with many blockchains is unlimited. Avalanche blockchain changes the consensus algorithm according to the usage, and the network has more verifiers than other networks. It is one of the best non bitcoin cryptocurrencies in 2022 and can buy good returns.

## Shiba Inu

Shiba Inu is another memo cryptocurrency and one of dogecoin's biggest competitors. Although Shib was whimsical at first, it has successfully gathered a growing loyal community, which is one of its biggest selling points. The community also created an NFT project around Shib so that it can be favored by more investors.

## Decentraland

Decentraland is the token behind a virtual reality game of the same name based on Ethereum blockchain. Crypto is described as a 3D virtual world where users buy land to develop and monetize content, buy goods and services, and access other properties.

## Dogecoin

The famous entrepreneur Elon Musk has popularized this cryptocurrency called dogecoin since it appeared in the cryptocurrency market. But Elon Musk is an influencer of dogecoin - his encrypted tweets control the sudden rise and fall in the price of this cryptocurrency. Investors are surprised to see dogecoin as both a serious cryptocurrency and a meme currency.

## Solana

Solana matches Ethereum in two key areas of development, speed and low transaction cost. Ethereum's structure limits the number of transactions per second on its network to 15-30, creating a bottleneck leading to these high gas bills. Because of its revolutionary quality, it has attracted many cryptocurrency investors.
