Will SPONGE and AiDoge Take Off After Pepe Coin? As Binance Delays Exchange Listing

Original:

<https://www.btcc.com/en-US/academy/research-analysis/will-sponge-and-aidoge-take-off-after-pepe-coin-as-binance-delays-exchange-listing>

Despite reports that Binance, the largest [cryptocurrency exchange](#) by trading volume, has delayed the much-anticipated listing, the price of [Pepe coin](#) continues with the surge.

As to the most recent announcement from the bourse, “the trading start time for [FLOKI \(FLOKI\)](#) and [Pepe \(PEPE\)](#), originally set at 2023-05-05 16:00 (UTC), will be postponed to 2023-05-05 18:00 (UTC).”

The Binance Launch of Pepe Coin Trading

Binance's CEO, Changpeng Zhao (CZ), stated during a recent AMA that the exchange has no plans to list the new meme coin. Despite this, Binance has announced that the new meme coins PEPE and [Floki Inu](#) will be listed on the exchange on May 5 in the innovation zone.

[#Binance](#) will list [@pepecoineth \\$PEPE](#) and [@RealFlokiInu \\$FLOKI](#) in the innovation zone.

It's possible that a problem with the two tokens' deposits led to the decision to postpone the listing. Deposits to Binance were temporarily halted on Friday "due to technical difficulties."

During this time, the exchange tweeted, "Please note that you may not be able to view your deposits of FLOKI or PEPE while we work to resolve the issue."

Pepe Coin Increases by 55% to \$0.000003

Recently, Pepe Coin has become a hot issue in the realm of digital currencies and meme coins.

Launched in the middle of April 2023, the PEPE coin is based on the popular Ethereum blockchain and features the green anthropomorphic frog from the popular internet meme “Pepe the Frog,” which was developed by artist Matt Furie.

When compared to other meme coins, such as Shiba Inu, Dogecoin, and FLOKI, PEPE’s performance stands out. It has reached an all-time high.

As a result, Shiba Inu has moved up to second place and PEPE has moved into third place in the meme coin rankings. The market valuation for PEPE exploded to \$1.2 billion at its all-time high price of \$0.000004354, a new record.

In addition to the decentralized Uniswap v2 and v3, KuCoin, OKX, Gate.io, Bybit, MEXC, LBank, and PEPE are more exchanges where you may buy and sell PEPE.

On Saturday, following Binance’s listing announcement, Pepe Coin was selling at \$0.0000031. PEPE has found support at \$0.0000025 on the two-hour chart, but it will likely encounter resistance at the daily open, now at about \$0.000003785.

Pepe Coin Price Prediction

A sell signal from the Moving Average Convergence Divergence (MACD) barrier could cause a decline if selling congestion is not alleviated in the coming days.

PEPE is currently trading at \$0.0000008264, which is above the 200-day EMA of \$0.000001539 and the 100-day EMA of \$0.0000020912, suggesting that the current uptrend will continue to 0.000005 before the start of the next week.

The AiDoge and SPONGE Rally Melts Amid Pepe Coin Uptrend

Another zero-value coin is getting a lot of attention in the cryptocurrency market as PEPE continues

to break records.

The \$SPONGE coin, which has its roots in the popular kids' cartoon SpongeBob SquarePants, has the potential to offer investors returns greater than 100 times their initial investment.

Move over \$PEPE, \$SPONGE is here pic.twitter.com/2QFrqMAGhU

— \$SPONGE (@spongeoneth) [May 5, 2023](#)

As of this writing, \$SPONGE has increased in value by an astounding 45.9% over the course of the past day, reaching a new all-time high of \$0.0005108. Its smaller market cap appeals to investors because of this.

In contrast to \$PEPE, this new ERC-20 meme coin is valued at over \$20 million at its full dilution, and its market cap is just around \$18 million. However, its trading volume is on fire, with over \$21 million changing hands in only 24 hours, an increase of 48%.

SPONGE is just getting started, but if the current buying frenzy keeps up, investors might see returns of 100x or more. A sudden influx of cryptocurrency billionaires is possible if \$SPONGE's market cap reaches \$1 billion.

The AiDoge meme uses the same artificial intelligence technology as ChatGPT and DALL-e, making it a formidable tool for original thought. Users provide a text prompt defining the desired meme to generate it. In addition, \$AI tokens are given out monthly to the creators of the most viral memes.

There will be plenty of incentive and earning opportunities for these producers as the platform grows.
