## Why Are XRP Prices So Low? The Price Prediction of Ripple

Original:

<https://www.btcc.com/en-US/academy/research-analysis/why-are-xrp-prices-so-low-the-price-prediction-of-ripple>

[XRP](#) is one of the oldest and most well-known [cryptocurrencies](#) and has the most institutional support so far. After catching up with the cryptocurrency market, what is the possible future price of Ripple? Before that, let's take a look at the value of the Ripple and its position in the market.

At the time of writing, XRP was priced at \$0.78, but some believe it could reach \$1 by the end of 2022. XRP is a cryptocurrency that runs on the Ripple network. The main reason behind its low price is that the US security and Exchange Commission (SEC) is suing Ripple for \$1.3 billion. This may last for a short time, at least until the end of this year. At some point, however, experts predict that the price of the Ripple will rise again.

### XRP Updates

- After the victory against the SEC, the price of XRP reportedly increased to US\$1 on Fxstreet.
- The price of XRP has decreased by 5.33% over the previous week. That's a drop of 88.73% from the record high of \$3.84.
- The recent rise in XRP's value is an optimistic indicator. The SEC has stated that the coin's value may increase by 50%.
- In addition, best-selling author Bryant McGill is optimistic about the future of XRP.

### Why Has the Price of the Ripple Fallen So Much?

The Ripple experienced a major collapse at the end of 2020. As mentioned above, the price collapse occurred due to the lawsuit filed by the U.S. Securities and Exchange Commission against Ripple. After that, the price of XRP hit a record low. By the end of 2020, the circulation price will be about US \$0.17.

Although this worries cryptocurrency investors, the Ripple still has great potential. This is mainly because the innovative [Ripple](#) and XRP trading are very easy. In addition, if Ripple wins the lawsuit against the U.S. Securities and Exchange Commission, it is likely that more traders will participate in Ripple's transactions.

**[Trade on BTCC and Get 3500 USDT](#)**

## Will the Price of Ripple Increase?

Some experts predict that by the end of 2022, the price of Swiss francs will rise again. The forecasts made by investors on medium confirm that the price of the Swiss Franc may reach \$5 in the next few years.

In addition, some smart cryptocurrency investors and trusted cryptocurrency websites believe that XRP will be able to bring a lot of profits to investors in the near future. One of the factors is the cooperative relationship between Ruibo and some very large companies. This gives the Ripple some stability and may prevent it from hitting a lower price. Although the SEC's accusations have caused heavy losses, analysts believe that the Ripple is likely to flourish again and may reach a high price of \$10! This is also a feature of the reborn coin.

According to the latest long-term repo price forecast, XRP will rise to \$2.56 by the end of 2023 and \$8.07 by the end of 2025. Then, the value of the Ripple will rise to \$16.48 in 2027 and \$29.47 in 2030.

But how realistic are these beliefs? If you ever want to know "is reborn a good investment?" Or "can XRP be worth more than bitcoin?" - Please read on. We're going to explore some of the top Ripple forecasts to see how much this cryptocurrency might be worth between 2022 and 2025.

# **XRP Price History**

If you want to invest wisely, analyzing the past performance of XRP cryptocurrency is one of the most important steps, so let's take a look at the price history of Ripple and how the price of XRP has changed in the past.

What was the earliest price of XRP? When coinmarketcap first started tracking the price of XRP, it sold at a weak price of \$0.005613 on August 5, 2013. What is the maximum price of XRP? XRP reached an all-time high of \$3.84 on January 4, 2018. What is the historical low point of XRP for the rabbi?

XRP reached an all-time low of \$0.002802 on July 7, 2014. In 2021, XRP started at \$0.2374, reaching a 52 week high of \$1.96 and a 52 week low of \$0.3793. At the end of 2021, the price of XRP was \$0.8312.

## **Technical Analysis of Price Trend of XRP**

From the XRP price chart above, we can see that there have been several major surges in the price of Swiss coins over the years. The biggest and most striking event occurred in 2018. Recently, in 2021, the price of the Ripple fluctuated much more than in previous years. However, even before the bull market in 2018, Ripple was a highly volatile asset, although XRP may not look like this today.

Now, the price forecast of the Ripple is the focus of many investors. The general advice is to buy! The following is the technical analysis signal of the cryptocurrency. A key issue to note about XRP's price performance is that although it usually follows the market (more specifically bitcoin), it is difficult to obtain due attention in the recent bull market due to its lawsuit with the U.S. Securities and Exchange Commission.

## **Long Term Outlook For XRP Price**

As a long-term investment, the Ripple is expected to perform very well. According to the forecast, the value of XRP token of reborn coin may rise to US \$1 by the end of 2022, US \$3.7 in 2023 and reach the average price of US \$6.55 by 2025. This is a moderate but stable growth of more than 722%.

In addition to analyzing the historical price of the Ripple, it is important to determine the key factors that may affect its price in the future. This will make it easier for you to make your own predictions based on the current cryptocurrency trend and find a wise answer to the question 'should I invest in Ripple?'.

At the end of December 2020, the U.S. Securities and Exchange Commission (SEC) filed a lawsuit against the XRP platform, Brad Garringhouse and Chris Larsen, accusing them of selling unregistered securities worth \$1.3 billion. Galinhaus called the lawsuit an "attack on the entire cryptocurrency" - although the incident has not had a particularly devastating impact on XRP's price, if the lawsuit succeeds, investors may see the price collapse.

Galinhaus said in a statement that the SEC case was "fundamentally wrong in law and fact" and that "the SEC has allowed XRP to operate as a currency for more than eight years, and we question the motivation to file this lawsuit a few days before the government change".

**[Trade on BTCC and Get 3500 USDT](#)**

## **Withstand the Storm of Strict Government Intervention**

The arrival of new cryptocurrency regulations may affect the prices of almost all cryptocurrencies in the market. But as we mentioned earlier in this article, many experts believe that the Ripple is better able to withstand the storm of strict government intervention. Therefore, although the new regulation may lead to investor uncertainty and may reduce the price of traditional cryptocurrency, it may soar the price of Ripple.

The existence of the so-called "whale robot" in the cryptocurrency exchange can manipulate the price of cryptocurrency on a large scale. Whale robot is a large user who runs software to automatically execute transactions. It often executes transactions on a large number of different platforms and assets at the same time. This leads to artificially creating fluctuations, thereby driving up or down the price of cryptocurrency.

The higher the demand for any cryptocurrency and the less the supply, the more likely we are to see prices rise. Unlike cryptocurrencies such as bitcoin, the value of Ripple coin is strictly controlled by its parent company, Ripple Lab. The company currently holds more than half of the total number of all Ripples to maintain price control. However, if Ripple Lab suddenly decides to sell these things, new tokens will flow into the market, which will have a huge impact on the price.

## **XRP Price Prediction 2022**

Before investing, it is wise to understand the short-term and long-term prospects of the Ripple. As mentioned above, today's XRP price is about US dollars, down% since the beginning of 2022. However, considering this decline, what can we expect from RUIBO for the rest of this year? 2022 will be a rebound year for the XRP as it regains lost ground in its struggle with the securities and Exchange Commission.

For this reason, our forecast of the price of the Swiss coin in 2022 estimates that the token may reach \$1.30 by the end of the year - 67% higher than today's price. If it rises to \$1 in the middle of 2022, XRP is likely to reach a high of \$1.32, and then end the year at an estimated price of \$0.87. The lowest short-term price of Rabbi XRP in 2022 is predicted to be US \$0.46, and the asset will achieve an average price of US \$0.97 this year.

[\*\*Trade on BTCC and Get 3500 USDT\*\*](#)

## **XRP Price Prediction 2023**

With the support of the securities and Exchange Commission for REBO, XRP may see a huge boost from investors from all walks of life. In general, if this happens, we will expect institutional investors to have more demand for XRP. Therefore, our price forecast for the Rabbi in 2023 estimates that the Rabbi may reach \$3.74 - an increase of 379% from today's level.

## **XRP Price Prediction 2024**

The improvement of cryptocurrency regulation may bring confidence to more traditional investors and make them start to invest in Ripple. Because of this, our price forecast for XRP in 2024 is between the highest \$5.44 and the lowest \$2.13. The currency is also expected to end at an average price of \$4.77.

If you want to know "should I invest in Ripples?", The short-term XRP forecast looks really good, ranging from \$0.46 to about \$5.44 from 2022 to 2024. However, if you agree with our long-term investment strategy in 2025, let's see if you agree with our long-term investment strategy in 2025. What will we see in the long run?

## **XRP Price Prediction 2025**

With the announcement of new and improved services in 2025, it is possible to see the REBO XRP regain the third place in terms of market value. Assuming this is the case, we estimate that the price of Swiss won in 2025 will reach a record high of US \$8.07 and may exceed this level.

The highest target for the long-term price forecast of the Ripple is \$8.76, the lowest target is \$3.98, and the average estimate is \$6.55 – an increase of 70% based on the current historical high of XRP.

## **XRP Price Prediction Beyond**

In 2026, Ripple will establish partnerships and memorandums of understanding with many of the world's top financial regulators. If XRP can rebound to the resistance level of \$10, it is predicted that it will reach an all-time high of \$12.10 in 2026. Our Ripple forecast also foresees that XRP will remain strong at the lowest \$8.51 and indicates that XRP / USD will end at the median of \$11.64.

In 2027, Ripple's list of partners may increase several times as it becomes the preferred platform for building blockchain projects. Five years later, the price of the Ripple can reach an all-time high of \$17.13 and a low of \$13.45. Our 2027 forecast also speculates that XRP will reach \$16.48 by December and complete the average level between \$15.50 and \$16.50.

2028 is likely to be a year of unprecedented large-scale institutional investment in XRP, as it has proved its immunity to strict regulators. The bullish momentum can make XRP reach the highest price of \$22.40, while conversely, it may see a low price of \$15.82. In 2028, the average price at the end of the year is US \$20.02.

The further application of XRP token can provide further utility and increase demand for the asset. Continuing its long-term bullish trend, XRP forecasts that the token will exceed \$25 per currency in 2029. The expected high in 2029 is \$26.32 and the low will be \$18.76. The average price at the end of 2029 is \$25.55.

## **XRP Price Prediction 2030**

By 2030, Ruibo's network may surpass visa and become the world's largest payment service provider. Our long-term price forecast for the rybowon in 2030 indicates that it has increased by 3883% since today's price, and the token is expected to hit a record high of \$31.81. The Ripple will also be no less than US \$23.70, ensuring an annual average of US \$27.09 and reaching US \$29.47

by the end of 2030.

## **Will Ripple (XRP) Hit \$5?**

According to the XRP price estimates, most experts are sure Ripple (XRP) will be priced above \$5 by 2030.

As for the future XRP long-term prognosis, this is one of the toughest to determine. However, a strong business model appears to have been built by Ripple.

Concerning pricing history, some analysts rightly anticipated the Ripple may comfortably double or treble value, probably even more so, as the success of the parent firm lessens the likelihood of crypto-market instability.

If both the crypto demand and the commercial venture of Ripple are robust, we could see an increase in XRP's worth to more than \$5 per token by 2030.

## **Conclusion**

Ripple XRP Price Forecast is fairly adamant that the price of XRP will rise for the remainder of the decade. That said, Ripple's fight with the SEC is not over yet, so investors should be careful. While it seems likely that Ripple will win, nothing is 100% certain at this point, and if the SEC wins, it could weaken the price of XRP.

On the flip side, if Ripple beats the SEC, XRP will come back even stronger. In the eyes of banks and institutions, it is virtually invincible, which could lead to further investment. In the eyes of institutional investors, XRP will look immune to regulation and is perhaps the safest investment option in the cryptocurrency market.

If you have been looking for the latest Ripple XRP price predictions, we hope you have found this article helpful. Cryptocurrency investments are notoriously risky, and if you're considering adding Ripple to your portfolio, it's crucial to have a strong risk management strategy in place - however, cryptocurrency trends suggest that Ripple's value will eventually rise by about 700% by 2025.

Based on these projections, and the advice of Ripple Labs CEO Brad Garlinghouse himself, it seems best to invest in Ripple XRP if you're prepared to play the long game. we could see a significant increase in price, and the charts suggest that this could be a wise investment for those happy to take a long-term position.
